FSC Gender Pay Gap - April 2018

Gender Pay Gap reporting is an annual legal requirement that was introduced in April 2017 and shows the difference between the average hourly rate of pay received by men and women across all ages, regardless of their work. The information is based on a snapshot of data from 5 April each year. This is our second year of reporting.

What’s our Gender Pay Gap?

We have compared both the mean (average) and median (mid-point) in the hourly rate we paid to men and women on the snapshot date of 5 April 2018.

The difference in hourly pay between men and women:

- **Mean:** 20.8%
- **Median:** 8.5%

Both of these measures show a slight improvement on April 2017: the mean has decreased by 2.2% (from 23%), and the median by 3.9% (from 12.4%).

How is pay distributed?

The pay quartiles shown in the diagram below have been calculated by listing the rates of pay for every employee from the lowest to highest, before splitting that list into four equal-sized groups and calculating the percentage of males to females in each.

<table>
<thead>
<tr>
<th>Quartile</th>
<th>Percentage of Males</th>
<th>Percentage of Females</th>
</tr>
</thead>
<tbody>
<tr>
<td>Top quartile</td>
<td>48.0%</td>
<td>52.0%</td>
</tr>
<tr>
<td>Upper middle quartile</td>
<td>37.4%</td>
<td>62.6%</td>
</tr>
<tr>
<td>Lower middle Quartile</td>
<td>27.6%</td>
<td>72.4%</td>
</tr>
<tr>
<td>Lower quartile</td>
<td>26.8%</td>
<td>73.2%</td>
</tr>
</tbody>
</table>

What does this tell us?

Our gender pay gap is mainly due to a higher proportion of females in our lower paid roles, in areas such as housekeeping, catering and administration. This is typical of the gender balance in these type of roles across the UK as a whole. However, this balance has shifted
slightly with the proportion of women in the lower quartile having reduced by 7.0% (from 80.2% in 2017), and both the upper middle and top quartiles having increased by 2.2% and 2% respectively (from 60.4% and 50% in 2017). We are proud to once again report a balanced gender mix within the top quartile.

Overall, the proportion of women employed across FSC remains relatively unchanged at 65% (compared to 65.8% in April 2017) and although we strive to achieve gender balance we also believe in recruiting and promoting based on merit.

How are we addressing our Gender Pay Gap?

We are committed to driving down our gender pay gap and will continue to promote our flexible and family friendly policies. We want to ensure that both women and men are evenly represented at all levels in our organisation. We have benchmarked FSC salaries against similar sector organisations and evaluated role profiles for all our jobs to ensure equality and consistency.

The FSC is an organisation where people can thrive and develop regardless of their gender or background, and we will continue to offer fair, equitable pay to all colleagues.
