

Partnership projects

FSC extends our reach and impact by being an active partner in both national and local projects.

These projects increase access to learning opportunities and engage under-represented communities. They also assist young people seeking to start a career in nature or give them a platform to speak on environmental issues. This work contributes to the growing evidence base for the multiple benefits of nature connection.

FSC's close partnership with **The Royal Parks** in London extends our ability to offer a range of courses in exciting built up and natural habitats, but in easy reach of tube and train stations.

FSC is a partner in **Our Bright Future**, a programme funded by the National Lottery Community Fund. FSC works in partnership with two projects. The **Growing Confidence** project in Shropshire builds skills and confidence in young people through exploring wild places and the wildlife in them. The **Green Futures** project in Yorkshire develops wellbeing and life skills in young people, particularly the annual Youth Environment Summit which is organised and delivered by young people at FSC Malham Tarn.

A new partnership with the **London Borough of Lewisham** delivers outdoor learning in **Beckenham Place Park**. It was one of our first places to resume lessons in the park after lockdown.

9,166 learners
in **Bushy Park,**
Greenwich Park and
The Regent's Park
