### **Butterfly Spotting**

Scan to buy your guide

Go outside to a green space with flowers or long grass.

Walk slowly and quietly and look carefully in the verges and flower beds.

See if you can spot any butterflies flying from one flower to another, or resting on the flowers.

Think carefully about what the butterfly looks like.

What colour is it?

What markings does it have?

Use your notes and drawings to find out what butterfly you found.

Date and Place		

# **Ladybird Spotting**

Scan to buy your guide

Go outside to a green space with flowers or bushes.

Walk slowly and quietly and look carefully in the plants, leaves and flower beds.

See if you can spot any ladybirds crawling from one plant to another, or sheltering under leaves.

Think carefully about what the ladybird looks like.

What colour is it?

How many spots does it have?

Use your notes and drawings to find out what ladybird you found.

Date and Place		

#### **Bee Spotting**

Scan to buy your guide

Go outside to a green space with flowers of all sorts!

Walk slowly and quietly and look carefully at blossom and inside the flowers.

See if you can spot any bees flying from one flower to another, or resting on the flowers.

Think carefully about what the bee looks like.

What colour is it?

Is it hairy? Does it have stripes?

Use our ideas to start your own notes and drawings to find out what bee you found.

# **Dragonfly Spotting**

Scan to buy your guide

Take a walk near a river or stream or pond.

Walk slowly and quietly and look carefully in the plants and reeds growing close by.

See if you can spot any dragonflies flying from one spot to another, or resting on the leaves.

Think carefully about what the dragonfly looks like.

What colour is it?

What markings does it have?

Use our ideas to start your own notes and drawings to find out what dragonfly you found.

Well done! Now, can you find another?

Date and Place		

# Garden Bugs and Beastie Spotting

Scan to buy your guide

Go outside to a green space with flowers or long grass, or shady spots.

Walk slowly and quietly and look carefully in the verges and flower beds.

See if you can spot any bugs scuttling from one safe place to another, or hiding in the shadows.

Think carefully about what the bug looks like.

What colour is it?

What markings does it have? Do you need to draw the legs longer? Or the body thinner?

Use our ideas to start your own notes and drawings to find out what bug you found.
